Supported from:

**Is a play-based learning program for  
parents with children from 6 months**

In our team we speak  
Turkish, Kurdish, Arabic, Spanish,  
English and German

## What is e:du?

- e:du is a play-based learning program for you and your children aged from 6 months to 3 years
- With e:du, you support the development of your child.
- e:du offers you a wide range of play and activity materials.
- The activities and play materials are child-friendly and age based.
- You can participate in the program up to 3 years.
- Participation is free.

## How does e:du work?

- At the beginning of the program a home visitor visits you once a week at home. Later every second week.
- They bring you play and activity materials.
- They give you tips, suggestions and are available to answer your questions about the program.
- By playing every day and spending time together you support your child's development.
- Regular group meetings take place after a few weeks.
- At meetings you can share experiences and ideas with other parents. You will receive information on all topics related to parenting. Also group excursions take place, e.g. zoo, museum.

## What does e:du effect?

- While playing with your child, you will discover how much they enjoy learning.
- You discover your child's interests. S/he will look forward to playing together with you.
- Your child learns how to handle different materials and will discover something new for itself.
- This will help your child on their way to independence.
- e:du prepares well for the day care center and also provides support during it.
- e:du answers parents' questions about early childhood development and gives information about family offers in their district.
